### MAXIMUM GPS POWER

Compact and waterproof device is equipped with the latest technology with high GPS sensitivity for positioning accuracy up to 20 km. Data transfer to the mobile app enables absolute overview of your dogs. 1850 mAh battery enables the device to be actively used for more than 40 hours.

### BEEPER LOCATOR

Strong acoustic signal emanating from built-in loudspeaker is used to locate a dog in difficult terrain, such as thicket or dense forest. The acoustic signal may be set at four volume levels and can be heard at a distance of up to 300 m.

### TRAINING MODULE

Training acoustic signal is provided as a standard on GPS X30. X30T transmitter has also additional practical feature, namely removable training module with contact points and powerful LEDs for light signalling in the dark. Stimulating pulses may be set at several levels with the option of selecting short or long pulse.
