

X40

GPS TRACKING AND TRAINING SYSTEM FOR DOG

TRAINING BUTTONS

with extended functions including
vibration and RGB location light

MAXIMUM ACCURACY

positioning using advanced GNSS technology

MEMORY FOR 38 USERS

and 6 dogs tracked live on the main screen, including key statistics

ONLINE HUNT SHARING

and team data transfer for perfect cooperation between large groups of hunters

UNINTERRUPTED RECORDING

the collar stores the dog's movements in its memory even when the RF signal is lost.

SOUND TRANSMISSION FROM THE FIELD

the collar records and plays back sound from the dog's current location

MAXIMUM PERFORMANCE

up to 50 hours of operation and energy-saving mode when battery

Everything important at a glance

The main screen displays up to 6 devices simultaneously with key data in real time - direction, distance, movement and barking of the dog, signal and battery status.

The controller can hold **up to 38 collars and controllers** and stores their routes and statistics for later viewing.

You can also view a list of route points. You can store **up to 40 waypoints** in the controller.

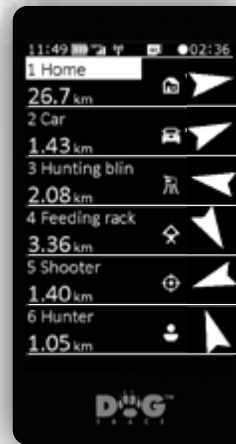

TRACKING UP TO 38 DEVICES

UP TO 40 WAYPOINTS

DATA OVERVIEW - STATISTICS

Take control of the weather

Monitor weather conditions during the hunt with the integrated 24-hour forecast - including wind direction and speed, sunset time, and your and your dogs' altitude in real time.

24-HOUR WEATHER FORECAST

CURRENT ALTITUDE

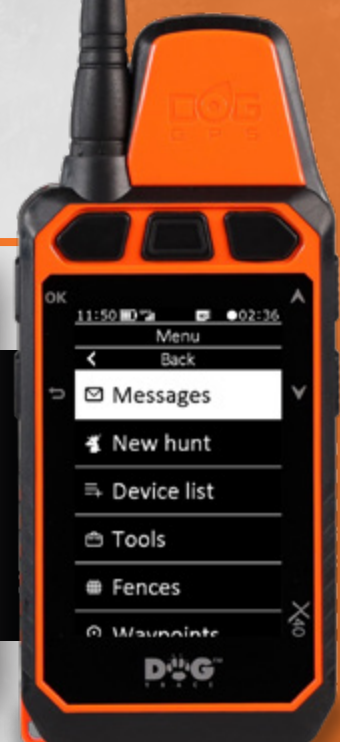

Lightning-fast communication

Stay in touch with your team even while hunting - preset text messages in the controller make communication quick and easy.

OTHER TOP FEATURES

| Audio, text or vibration alerts

When detecting movement or stopping of the dog, barking, loss of signal or crossing the geofence.

| Extended signal coverage

Thanks to the cooperation of all controllers, it is possible to increase the signal for tracking

| Remote collar sharing

Track your dog from anywhere using a unique code.

| Sharing hunting spots and other POIs

Save and share important locations with colleagues.

| Encrypted communication

Safe and secure transfer of sensitive data.

| Theft protection

Prevents unauthorised pairing of the collar.

| Online updates

Always the latest software for collars and handheld devices.

Compatibility with X30 series collars

| DOG GPS X30

| DOG GPS X30B

| DOG GPS X30T

| DOG GPS X30TB

Dogtrace GPS App

Connect the device to **your mobile phone, tablet or smartwatch** and make the most of all its features, including **tracking your dogs' movements on a map**.

- | Easy pairing with your phone and data synchronisation
- | Display all necessary data on map backgrounds
- | Track, trace and record up to 38 devices
- | Record routes and play them back, save your current position and other important locations.

NEW Web application

- | View all statistics, play back recorded routes and other important information on your PC or laptop via the web application from the comfort of your home.
